You use your deceptive skills to make your illusions seem even more real. Attempt a Deception check against the target's Perception DC. If you succeed, the target fails to disbelieve the illusion.**Distracting Flattery** ➤ **Prerequisites** Dandy Dedication, expert in Deception **Trigger** You observe a target's attitude toward yourself or your allies decrease as a result of an ally's behavior. You know how to maintain a good impression and manage your image, even while keeping uncouth company. Make a Deception check against the target's Will DC. Regardless of your result, the target is temporarily immune to your Distracting Flattery for 10 minutes. Success The target's attitude doesn't decrease as a result of your ally's social blunder. Failure The target's attitude decreases as normal. Critical Failure Your attempt makes matters worse, decreasing the target's attitude toward you by one step, in addition to any changes from the behavior that triggered this reaction.**Comforting Presence** ➤ **Prerequisites** master in Occultism **Trigger** An adjacent ally becomes frightened or stupefied. You use your occult connection to your allies to take on the fear and confusion they feel. Focus on your own calmness and pull in your nearby allies' emotions. Reduce the frightened and stupefied condition values of adjacent allies by 1, and increase your frightened and stupefied condition values by the same amount.**Second Thoughts** ➤ **Trigger** You cast a mental spell that targets one creature, and it critically succeeds at its Will save. When your target proves resilient to your magical deceptions, you can try them again on someone else. You can Cast the triggering Spell a second time, targeting a different creature, without expanding an additional spell slot. You can do so only until the end of your next turn, and you can't use Second Thoughts on it after the second casting of the spell.**Speed** 25 feet**Spell Protection Array** ◆ (Arcane, Manipulate) You inscribe a circle of arcane runes that dampen enemies' magic. You create a glowing magic circle in a 5-foot burst within 30 feet. Creatures in the circle gain a +1 status bonus to saving throws against magic. The circle lasts until the end of your next turn, and you can Sustain it, to a maximum duration of 1 minute.**Shift Spell** ◆ **Access** Faction requirement **Requirements** You have an active spell that affects an area and you are within the spell's range. You move the spell's area to a new location within 120 feet. The spell's remaining duration is reduced by half. The spell no longer affects its previous area.**Conceal Spell** ◆ (Concentrate, Spellshape) By shaping the magical energies and parameters of your spells all in your head through sheer concentration, you can simplify the incantations and gestures needed to spellcast,

leaving them barely noticeable. If the next action you use is to Cast a Spell, the spell gains the subtle trait, hiding the shining runes, sparks of magic, and other manifestations that would usually give away your spellcasting. The trait hides only the spell's spellcasting actions and manifestations, not its effects, so an observer might still see a ray streak out from you or see you vanish into thin air.

Scintillating Spell ♦ (Concentrate, Light, Spellshape) Your spells become a radiant display of light and color. If your next action is to Cast a Spell that doesn't have the darkness trait, has no duration, and requires creatures to attempt a Reflex save, the spell explodes in a spray of scintillating lights, in addition to its other effects. Each creature that failed its Reflex save against the spell is dazzled for 1 round, and those who critically failed are instead blinded for 1 round.

Heroic Presence ♦ (Emotion, Human, Mental) **Frequency** once per day The blood of heroes courses through your veins, and you inspire your allies to dig deep and find a new level of resolve. You grant up to 10 willing creatures within 30 feet the effects of a 6th-rank zealous conviction, though the effect automatically ends on a target if you give that target a command they would normally find repugnant. This action has the auditory trait or visual trait, depending on how you inspire your allies.

Reach Spell ♦ (Concentrate, Spellshape) You can extend the range of your spells. If the next action you use is to Cast a Spell that has a range, increase that spell's range by 30 feet. As is standard for increasing spell ranges, if the spell normally has a range of touch, you extend its range to 30 feet.

Eyes of the City ♦ (General, Skill) **Prerequisites** trained in Diplomacy or Society You can track down targets with the help of locals. You can use Diplomacy or Society, whichever you're trained in, to Track creatures in settlements. You chat with locals to help follow the trail of creatures you Track. At the GM's discretion, there might not be enough people to speak with to keep following the trail.

Quickened Casting ♦ (Concentrate, Spellshape) **Frequency** once per day Straining your mind, you collapse as much of your spell's formulas as you can, resulting in a shorter but much more complex incantation. If your next action is to cast a wizard cantrip or a wizard spell that is at least 2 ranks lower than the highest-rank wizard spell slot you have, reduce the number of actions to cast it by 1 (minimum 1 action).

Reveal Machinations ♦ (General, Skill) **Prerequisites** legendary in Deception You reveal that you played a minor but recurring role in another humanoid's life—or at least convince them that's the case. Attempt a Deception check against the target's Will DC. On a success, the revelation makes them frightened 2, and on a critical success they are frightened 3. In addition, you gain information about the subject as though you had attempted to Recall Knowledge about them using an appropriate skill and received the same result on your roll. You can't use this ability against the same humanoid again until 1 day has passed and you've also successfully disguised yourself as a different person.

Eye for Numbers ♦ (General, Skill) **Prerequisites** trained in Society You've learned to quickly estimate the number of items in a group with relative accuracy at only a glance. You immediately learn the number of visually similar items in a group you can see, rounded to the first digit in the total number. For example, you could look at a case of potion vials and learn that it held about 30 vials, but you wouldn't know that it was exactly 33 vials, how many different types of potions there were, or how many of which type. Similarly, you could look at a pile of 2,805 coins and know that there were about 3,000 coins in all. You can use this ability only on items that can typically be counted, so you can't use it on grains of sand or stars in the sky, for example. If you count a specific number of items possessed by an enemy, such as the number of coins or pieces of equipment they're carrying, you can use this information the next time you Feint or Create a Diversion against that target within 1 minute. If you do, you gain a +1 circumstance bonus to your check and can use Society instead of Deception for the check. You can use this action during an attempt to Decipher Writing that is primarily numerical or mathematical to gain a +2 circumstance bonus to your check.

Drain Bonded Item ♦ (Arcane, Wizard) **Frequency** once per day **Requirements** Your bonded item is on your person. You expend the magical power stored in your bonded item. During the current turn, you can cast one

spell you prepared today and already cast, without spending a spell slot. You must still Cast the Spell and meet the spell's other requirements.

Daydream Trance ♦ (Enchantment, Mental, Occult) You fall into a half-sleeping trance. This lasts for 1 minute or until you fall unconscious, whichever comes first. You can voluntarily end your trance by taking a single action, which has a concentrate trait, and succeeding at a Will save against your own class DC or spell DC, whichever is higher. Once your trance ends, you can't enter a Daydream Trance again for 1 minute. While you're in your trance, you gain the following effects: • You gain a +1 status bonus to Will saves. This bonus increases to +2 against mental effects. If you're legendary in Occultism, the bonus against mental effects increases to +3. • You take a –1 penalty to Perception checks and initiative rolls.

Dreamstone ♦ (Uncommon, Enchantment, Magical) **Activate** Interact (metamagic); **Frequency** once per day; **Effect** If the next action you use is to Cast a Spell of 4th level or lower that has the sleep trait or is associated with dreams, the spell slot is not expended.

Dreamstone ♦ (Uncommon, Enchantment, Magical) **Activate** Interact (metamagic); **Frequency** once per day; **Effect** If the next action you use is to Cast a Spell of 4th level or lower that has the sleep trait or is associated with dreams, the spell slot is not expended.

Archivist's Gaze ♦ (Apex, Divination, Invested, Magical) **Activate** command, Interact; **Frequency** once per hour; **Effect** Pushing the glasses up your nose and asking the entity for help, you cause the spectacles to cast either *true seeing* or a 3rd-level *comprehend language* on you. Because the entity tied to the spectacles chooses which one, the GM picks whichever spell is most immediately useful in your current situation (and chooses the most useful language each time the item casts *comprehend language*). The spell lasts for 1 minute.

Bag of Cats ♦♦ (Uncommon, Conjuraton, Magical, Transmutation) **Activate** Interact; **Frequency** once per day; **Effect** You shake the bag to produce a single cat. You cast a 3rd-level *summon animal* to produce a leopard.

Bag of Cats ♦♦ (Uncommon, Conjuraton, Magical, Transmutation) **Activate** envision, Interact; **Frequency** once per day; **Effect** You pull the bag over your head and it covers you completely. You then exit the bag in the form of a large cat. You gain the effects of 3rd-level *animal form* but must use the cat battle form.
